

SHARP®

R-23GT Commercial Microwave Oven

R-23GT 1600 Watts of Power

The engineering mastery of the R-23GT makes it easy to meet the challenges of any high-volume operation. The dependability, performance and convenience add up to an investment that pays off.

R-23GT

R-23GT
1600 watts
HEAVY DUTY

Dual Magnetrons

Offers reassurance that if one magnetron fails, oven continues to work at half power. Business isn't lost while you wait for service agent to arrive.

Top and Bottom Feeding

Provides unparalleled cooking, heating and defrosting performance. Both the top antenna and the bottom antenna have a motor to distribute the microwaves evenly throughout the oven.

Space-efficient Design

Comes with a mounting plate for easily securing one oven on top of another.

Computerized Touch Control

Microprocessor-controlled Memory pads provide one-second increment timing for flexible operation that's truly easy and dependable. Built-in safeguards prevent unauthorized changes.

Stainless Steel Cabinet and Cavity

Won't pit, chip, scratch or corrode. Also has sturdy grab handle, oven light, see-through door and rubber-sealed ceramic shelf.

Programming Flexibility

10 Memory pads can be customized for each menu item and easily converted to 20 memories; or the user can program oven manually. Three-stage programming permits easy sequencing of defrosting/cooking stages for added convenience.

SelectaPower™

Provides 10 variable power levels; helps eliminate overheating or crusting of edges.

Express Defrost

Automatically divides total defrosting time into 3 stages using 3 power levels. Quick and easy!

Double Quantity Pad

There's no guesswork! Automatically provides optimum heating times for two portions.

Memory Check

Operator can easily confirm time setting and power level (program) for each Memory pad.

Memory Lock

Prevents stored information from being erased during power outages; offers greater peace of mind!

Counter Check

Lets manager know how often each feature is used and total number of manual uses.

Lighted Digital Display

Designed for accuracy and convenience. Clearly shows programmed and elapsed heating times, plus percentage of microwave power.

Signal Control

Offers a choice of 2 tones; signals the end of the cycle.

Menu Labels

Handy peel-off labels can be used on the control panel for each Memory pad.

Service Door

Lets user replace cavity light easily; no need for a service call or tools.

Demonstration Mode

Lets dealer demonstrate or user practice oven programming with no power in the oven. The timer will count down rapidly.

Built to meet rugged commercial standards.
Complies with DHHS & FCC.

R-23GT Specifications

AC Line Voltage:	Single phase, 230/208V, 60Hz, A.C. only
Receptacle Required:	15 Amp., NEMA 6-15R
AC Power Required:	2.5 kW, 13A
Output Power:	1600W (IEC-705-1988 Test Procedure)
Frequency:	2450 MHz
Outside Dimensions:	20 1/8"(W) x 13 1/4"(H) x 18 1/2"(D)
Cavity Dimensions:	13"(W) x 7 1/8"(H) x 13"(D)
Cavity:	Stainless steel
Cabinet:	Stainless steel
Anti-Theft:	Screw hole for 3/16" self-tapping screw, located 12" from hinge side of door and 5 1/4" back from front edge of removable filter.
Safety Switches:	Double safety switches include concealed interlock plus interlock monitor circuit
Safety Standards:	Commercial UL, FCC, DHHS and NSF-4
Net Weight:	Approx. 63 lbs.
Shipping:	Approx. 69 lbs.

To Specify a Sharp R-23GT Commercial Microwave Oven

Oven shall comply with standards set by the U.S. Department of Health and Human Services, FCC, NSF-4 and UL and shall display such labels. Oven shall be equipped with 10 programmable microprocessor-controlled Memory pads, each adjustable in one-second increments from 0 to 30 minutes, without tools. Oven shall also be equipped with optional manual programming. Signal level of audible indicators shall be adjustable. Oven shall have Electrically Alterable Read Only Memory (EAROM) to prevent programmed information from being erased due to power interruptions. Output wattage shall be 1600 watts. Top and bottom antennae feed distribution system with covers shall provide uniform heating pattern. Oven shall be equipped with SelectaPower™ control from 0 to 100 percent power in 10-percent increments. Oven shall have capacity to expand Memory pads from 10 to 20; a 3-stage, 3-power-level defrost system; and an automatic Double Quantity feature. Digital display must show heating time and percentage of power. Oven must have Demonstration Mode. Exterior cabinet shall be of stainless steel construction with see-through oven door. Cavity shall be stainless steel with interior oven light. Bottom of cavity shall consist of rubber-sealed ceramic shelf. Oven shall be equipped with double magnetron tubes with self-diagnostics. Voltage must be adjustable from 230 to 208V by simply changing voltage select cover plate. Oven shall have a three-year limited warranty on parts and labor in the end user's place of business.

Warranty

Sharp Commercial Microwave Ovens have a reputation for unsurpassed quality in the food-service industry. Sharp Commercial Microwave Ovens are backed by a three-year warranty on parts and labor with service provided in the end-user's place of business. See operation manual for complete details.

Specifications subject to change without notice.
